

GOVASSURE

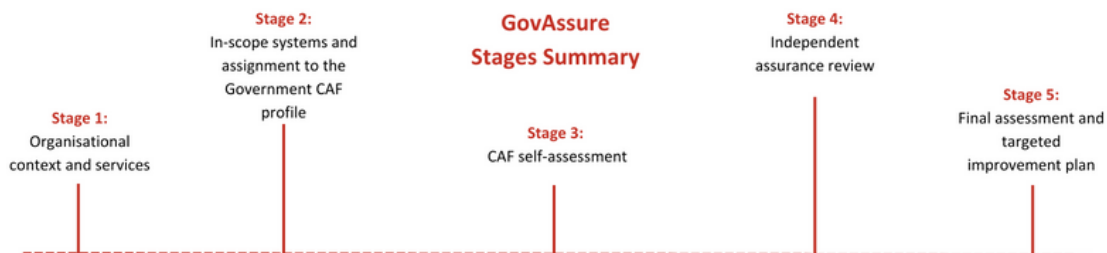

Background

GovAssure is the cyber security assurance approach replacing the cyber security element of the Departmental Security Health Check (DSHC). It is designed to improve the security of networks and information systems that are required for essential Government functions; building resistance against cyber attacks and known vulnerabilities.

Using the NCSC Cyber Assessment Framework (CAF) our Independent Assurance Reviewers provide a verification of your WebCAF self-assessment of in scope OFFICIAL systems.

Scope of GovAssure

GovAssure is designed for OFFICIAL systems and will apply to government sector Critical National Infrastructure (CNI), bringing them under a common assurance process for cyber.

GovAssure provides a tailored, outcome-focused approach for government-specific risks, offering a user-friendly interface to streamline workflows and data input. It integrates independent third-party reviews for unbiased assessments and sets clear expectations with targeted improvement plans to enhance performance and compliance.

How We Can Help

Features of the service include:

- Assessment of the attained maturity of your assigned Government CAF profile
- Validates achieved or partially achieved CAF contributing outcome responses
- Providing a high-level overview of cyber risk management maturity
- Identifying key cyber risks relevant to in-scope critical systems
- Assessment of the effectiveness of current cyber security controls
- Observations and recommendations for developing a Targeted Improvement Plan (TIP)
- An Independent Assurance Review Report (IARR) issued
- Delivery by qualified CISSP, CISM, ISO27001 cyber security consultants
- Delivery by trained GovAssure Independent Assurance Assessors

Put our experience to work for you and move your projects forward with confidence.
