

# PCI DSS CONSULTANCY SERVICES

## About PCI DSS

The Payment Card Industry Data Security Standard (**PCI DSS**) is a comprehensive framework of technical and operational requirements designed to help businesses protect cardholder data. Applicable to any organisation that stores, processes, transmits, or could influence the security of cardholder information, PCI DSS serves as a vital benchmark for safeguarding payment data. The standard is governed by the PCI Security Standards Council (PCI SSC), ensuring consistency and integrity in payment card security practices worldwide.

## Service Definition

Our PCI DSS consultancy service is led by qualified security professionals and offers assessments, SAQs (Self-Assessment Questionnaire) review and completion, and program management. Our step-by-step approach ensures compliance, guiding clients from scope assessment to remediation. Tailored assistance is available at every stage, including gap analysis and remediation program delivery.

## Features include:

Our step-by-step service provides dedicated support at every stage of the process, including;

- Assessment of PCI DSS scope, including optimisation and reduction where appropriate, with a detailed analysis of cardholder data flow
- Identification of Cardholder Data
- Analysis of PCI DSS Gaps
- Planning for PCI DSS Remediation
- Development of PCI DSS Policies and Documents
- Advisory on PCI DSS Self-Assessment Questionnaires (SAQ)
- Implementation of PCI DSS Compliance Programs

## What are the Benefits?

Our streamlined approach simplifies PCI DSS compliance, saving time and costs by narrowing the scope and eliminating unnecessary controls. We provide a clear plan for achieving full compliance, assist with SAQ and AoC preparation, and offer expert guidance from certified consultants. Access comprehensive policies, documentation, and cost forecasting support to justify budgets effectively.
